CAREER OBJECTIVE

Software Engineering student with experience in building AI systems and web applications. Seeking an AI or Software Engineer Internship to further develop technical skills, gain practical experience, and contribute effectively to the engineering team.

EDUCATION

- Ho Chi Minh City University of Industry and Trade** Ho Chi Minh City, VN
Bachelor of Information Technology - Software Engineering / GPA: 3.0/4.0 Sep 2023 – Present

TECHNICAL SKILLS

- Programming:** Python, FastAPI, TensorFlow, PyTorch, SQL, React, Dart, Flutter
- AI & Machine Learning:** LLM Integration, GraphRAG, Knowledge Graphs, LoRA and PEFT Fine-tuning, Vision Transformers
- Infrastructure:** Docker, PostgreSQL, MongoDB, Redis, Firebase, Git, Swagger and OpenAPI

EXPERIENCE

- Sigma Group** Ho Chi Minh City, VN
Front-end Collaborator Nov 2025 – Jan 2026
 - Insurance Web Interface:** Focused exclusively on developing and customizing the user interface for an insurance sales platform using Liquid.
 - Visual Structuring:** Translated design mockups into functional web pages, ensuring clean layouts and user-friendly navigation for insurance products.

PROJECTS

- LexiLingo – AI Language Learning Platform** GitHub: Link
Personal Project / Python, FastAPI, Flutter, PostgreSQL, LangGraph, Redis AI / Mobile Development
 - GraphCAG Pipeline:** Engineered a self-developed GraphCAG (CAG Optimization) tutoring pipeline using LangGraph with KG expansion, diagnosis routing, and cache gating.
 - Reliability:** Implemented a robust back-end with Redis-backed session management and structured metadata for pipeline observability.
 - Voice Integration:** Integrated Whisper STT and Piper TTS for low-latency voice interaction with automatic fallback to standalone LLMs.
- Hybrid CNN-CBAM-ViT for Skin Cancer Classification** GitHub: Link
Research Project / Python, TensorFlow, Computer Vision Research Deep Learning / CV
 - Novel Architecture:** Designed a hybrid architecture combining CNNs for local features, CBAM for spatial attention, and Vision Transformers for global context.
 - Performance:** Achieved 92.65% accuracy and 92.49% F1-score on ISIC datasets, effectively reducing false negatives in early-stage diagnosis.

HONORS & ACTIVITIES

- First Prize in Student Scientific Research Competition:** Won the Department-level First Prize for the project "Building the ViRes-HotelABSA Dataset for Aspect-Based Sentiment Analysis" at HUIT: **Certificate**
- Data Science Challenge Finalist:** Reached the final round in a Data Science competition. Contributed to feature engineering and model evaluation. **Certificate**
